

Eryri (Snowdonia) National Park

Forecast valid from 00:00 on Sunday 16 Jun 2024 until 23:59 on Monday 17 Jun 2024
Forecast Issued on Saturday 15 Jun 2024 at 12:07

Confidence: High for sunshine and showers at first, with a likely trend towards drier weather towards midweek.
Lower confidence for cloud and shower detail.

Headline for Sunday 16 Jun 2024: Sunny spells and scattered showers, these still heavy and perhaps thundery in places, but tending to become more isolated later.

Mountain weather hazards on Sunday 16 Jun 2024

Blizzards No Likelihood	Heavy persistent snow No Likelihood	Storm force winds No Likelihood
Gales No Likelihood	Severe chill effect Low Likelihood	Poor visibility Low Likelihood
Thunderstorms Medium Likelihood	Heavy persistent rain No Likelihood	Strong sunlight Medium Likelihood

Forecast for Sunday 16 Jun 2024

Weather: Showers probably more frequent and heavier through the morning and into the early afternoon, still heavy and thundery in places. However, there will also be sunny spells in-between. The showers will tend to weaken and become more isolated into the evening, with some longer clearer spells developing.

Chance of cloud-free hill tops above 800m: 40% improving to 90% or more.

Low Cloud and visibility: Cloud occasionally around 600m in the morning, especially in heavier showers. However, bases lifting largely above summits into the afternoon, although some brief reductions possible in any heavier showers. Generally very good visibility outside showers, with brief reductions in showers.

Meteorologist's View

Chance of thundery showers, perhaps giving lightning risk. High UV levels will give a risk of sunburn in longer sunny spells. Cool temperatures at height will give a noticeable chill despite the time of year.

Forecast for Monday 17 Jun 2024

Weather: Showers developing during the morning and again becoming quite frequent and heavy in places, continuing into the afternoon. However, there will also be sunny spells in-between. The showers will tend to weaken and become more isolated into the evening, with some longer clearer spells developing.

Maximum wind: West 15mph gusts 20-25mph.

Chance of cloud-free hill tops above 800m: 40% improving to 90% or more.

Low Cloud and visibility: Cloud occasionally around 600m in the morning, especially in heavier showers. However, bases lifting largely above summits into the afternoon, although some brief reductions possible in any heavier showers. Generally very good visibility outside showers, with brief reductions in showers.

Temperature: **Valleys:** Plus 7 Celsius, rising to Plus 17 Celsius
At 800m: Plus 5 Celsius rising to Plus 9 Celsius
Freezing level: Above summits.
